

# What is Essential Organics ‘Eczema’?

A new innovative approach to improve eczema and psoriasis-affected skin

Ingredients; Potassium, Sorbate, Sceletium, Colloidal Silver, African Griffonia Tincture, Passionflower Tincture

100% Organic Product

**Why we love it:** A must for any medical aid kit, Eczema gel is great in speeding up cellular repair. This organic gel is absorbed into the irritated skin tissue instantly, calming and soothing the problem areas. The healing extracts of the gel aid in the repair and nutrition of the inflamed areas. It can be effectively used on eczema, rashes, irritation, hives, insect bites & stings and is a must for any medical kit.

Uses; Eczema, Rashes, Irritation, Eczema:

Clean the affected skin surface with clean water and a non-allergenic soap and dry well. Apply *Eczema Gel* to all affected areas. Apply twice daily.

## 'Essential Organics' Key ingredients:

### Unique patent-pending formulation for acne and psoriasis skin conditions

**Sceletium tortuosum (Kanna) Extracts** are being used successfully by a number of psychiatrists, psychologists and doctors with excellent results as supplements to elevate mood and for stress and tension. In addition Sceletium has been used as a natural supplement to reduce the excitability of skin disorders so a natural healing process can begin.

**Colloidal Silver** has antibacterial properties. Research and published studies have shown colloidal silver prevents damage by free radicals, especially the hydroxide free radicals. Colloidal silver has been used in management of burns, and is one GCE's wound dressing for infection control and tissue healing potential.

**Griffonia simplicifolia (African Griffonia) Seed** contains 5-hydroxytryptophan (5-11% 5-HTP). This is the immediate precursor of serotonin. Griffonia simplicifolia extract has been used as a natural supplement to reduce the excitability of skin disorders so a natural healing process can begin

**Passiflora incarnata (Passion) Flower Tinctures** is used in traditional remedies as a "calming" herb for anxiety, insomnia, seizures, and hysteria. During the early twentieth century, this herb was included in many over-the-counter sedatives and sleep aids.

**Griffonia simplicifolia** is used by professional herbalists to help treat insomnia, tension, skin disorders such as eczema and psoriasis, and other health problems related to anxiety and nervousness.
