

# What is Essential Organics 'Rejuvenate'?

A new innovative approach to improve aged and damaged skin

Available as 'Rejuvenate'

Ingredients; Frankincense, Myrrh, Cedar Wood, Honey, Helichrysum, Lavender, Jojoba ,Avocado & Hemp Extracts

100% Organic Product

**Why we love it:** A must for any hand-bag! Rejuvenate gel is a great skin re-vitaliser gel.

Rejuvenate Gel is an integral component of rejuvenating damaged skin tissue following weight loss or pregnancy. It accelerates the healing process of old and new stretch marks. It can effectively be used on all tissue types and all areas of your body.

Uses; To re-vitalise and renew aged and damaged skin for all ages

Application: Apply Rejuvenate Gel liberally over all body areas.

## 'Essential Organics' Key ingredients: Unique MCC Registered formulation for aged and damaged skin

**Honey** has been used for over 3500 years as a wound dressing. Honey shows anti-bacterial properties that have only been recently researched. It has shown good anti-bacterial results in cases of MRSA-contaminated skin ulcers. The efficacy of honey in inhibiting strains of *Pseudomonas aeruginosa* from infected burns and controlling *Staphylococcus aureus* from infected and chronic wounds has been published.. Honey has been shown to accelerate wound healing in skin tissue, and delicate eye tissues.

**Boswellia carteri (Frankincense) Oil Extracts** are used to control infection and manage tissue regeneration and repair. The extract has anti-microbial and anti-fungal activity. Frankincense extracts are used in trans-dermal preparations to deliver pharmaceuticals into deep tissue and into the blood system.

**Helichrysum angustifolium (Everlasting Flower) Hydrosol** show biologically active compounds. Research has shown *Helichrysum* extracts to be antimicrobial, anti-inflammatory, anti-viral activity. *Helichrysum* extract interferes with the production of enterotoxins by *Staphylococcus aureus* and it inhibits herpes simplex virus type 1 activity.

**Lavendula officinalis (Lavender) Hydrosol** have been used to reduce pain and enhance wound healing. Lavender extracts show anti-microbial activity and has been used to treat parasitic infestations successfully. In addition, these extracts show antiinflammatory properties, suppress mutagenic potential, and have been used to manage wound infection and tissue healing. Lavender extracts cross the dermal surface easily, and have been shown to control and reduce allergic responses and neutrophil collection in tissue. Lavender odour has a calming effect on the patient.

**Simmondsia chinensis (Jojoba) Seed Oil** is used extensively in the cosmetics industry. Unlike common vegetable oils, jojoba oil is chemically very similar to human sebum and the oil is an exceptional moisturiser. Jojoba oil can be used to remove kohl and other water-proof cosmetics. It is popular to help treat stretched ear lobes and aids in skin tissue healing regeneration and healing.

# Benefits

- improves skin firmness and dermal density
- improves basic skin quality, condition and structure
- significantly reduces the visibility of fine line and wrinkles
- significantly improves the appearance of the skin both on face and body
- stimulates the regeneration of collagen and elastin cells
