

Product Presentation

RioBlush™ is packaged in a new concept known as ‘TOTTLES’.

RioBlush™ is packaged in a new concept known as ‘TOTTLES’.

Tottles are a nice substitute to bulky and heavy bottles, and are more comfortable to carry around. Consumers seem to prefer the tottle bottles with their trendy shapes and dispensing tops. Tottles have morphed into a style icon and these days more and more products have been found to be packaged in these trendy tottle bottles.

At GreyCell Enterprises, we have taken time to source high-end packaging solutions for our clients and we understand that marketers value the expectations of the end consumer. That’s why our tottles have been designed to leave a lasting impression on the end consumers and to help our marketers create a brand-loyalty as well.

Product Presentation

Our bottles are supplied with snap-on flip-tops. Bottles are manufactured in HDPE which has excellent properties. HDPE is inert with all our organic skin care range and no chemicals or product components leach out of the HDPE into our skin care range formulations.

Features	High Density Polyethylene (HDPE)
Material Code System Symbols
